Title of the Abstract: (Font; 14, bold, Times New Roman, center-aligned) should be brief and explain the study reported. Capital letters should be used only for the first word and proper nouns. Abbreviations should not be used.

Authors and Affiliations: The authors' names should be in the form of initials followed by surnames and should be center-aligned. The initials of the authors must be in uppercase letters and indicated before the surname. Each initial should be followed by a full stop without a space. A single space should be placed between the last initial and the surname. Separate names with commas, except for the last name, which should be preceded by the word 'and'. Terminate the author list with a full stop (Font; 12, Times New Roman, center-aligned). Leave a single space between the title and the authors' names. The corresponding author's name should be indicated by an asterisk (*) at the end of the name.

The author affiliation should be in italics and center-aligned. Leave no space between the authors' names and affiliations. If multiple names and addresses exist, they should be identified by superscript numbers (see the template). The email address of the corresponding author should be provided after the affiliations (Font; 12, Times New Roman, left-aligned, italicized). There should be a one-line space between the affiliations and the email address.

Text/Body of the Abstract: Should contain 250-300 words, justified; do not use subheadings such as introduction, material and methods, results, etc.

Keywords: Three to five keywords or phrases in alphabetical order, separated by commas.

No references, tables or figures should be included in the abstract.

Acknowledgements: You can include a brief statement of acknowledgement for any institute, organization, personnel or funding agency that supported your research work.
